Use Case #1

New Flagship Phone Upgrade Promotion

Marketing Brief – Use Case #1

Use Case Name

New Flagship Phone Upgrade Promotion

Goal

Drive flagship phone orders on existing customer accounts

KPIs

- ✓ Email & SMS click rate
- ✓ Product page views % increase
- ✓ Order volume

Description

Immediately following the launch of a manufactures' latest flagship device, send a targeted message to account holders and line users with older models – inviting them to upgrade their line and experience the future of mobile .

Variations

- ✓ To all qualified individual lines send a push notification letting them know they can upgrade their line
- ✓ When older than 4 years do not offer a free upgrade. When <4 years old offer a free upgrade to the flagship device w/contract commitment

Data Requirements

- ✓ Customer account information
- ✓ Customer line information
- ✓ Product details (as it relates to line)
- ✓ Consent (SMS/Email) for both the account and individual lines

Channels

- ✓ Email
- ✓ SMS
- ✓ Push (optional)

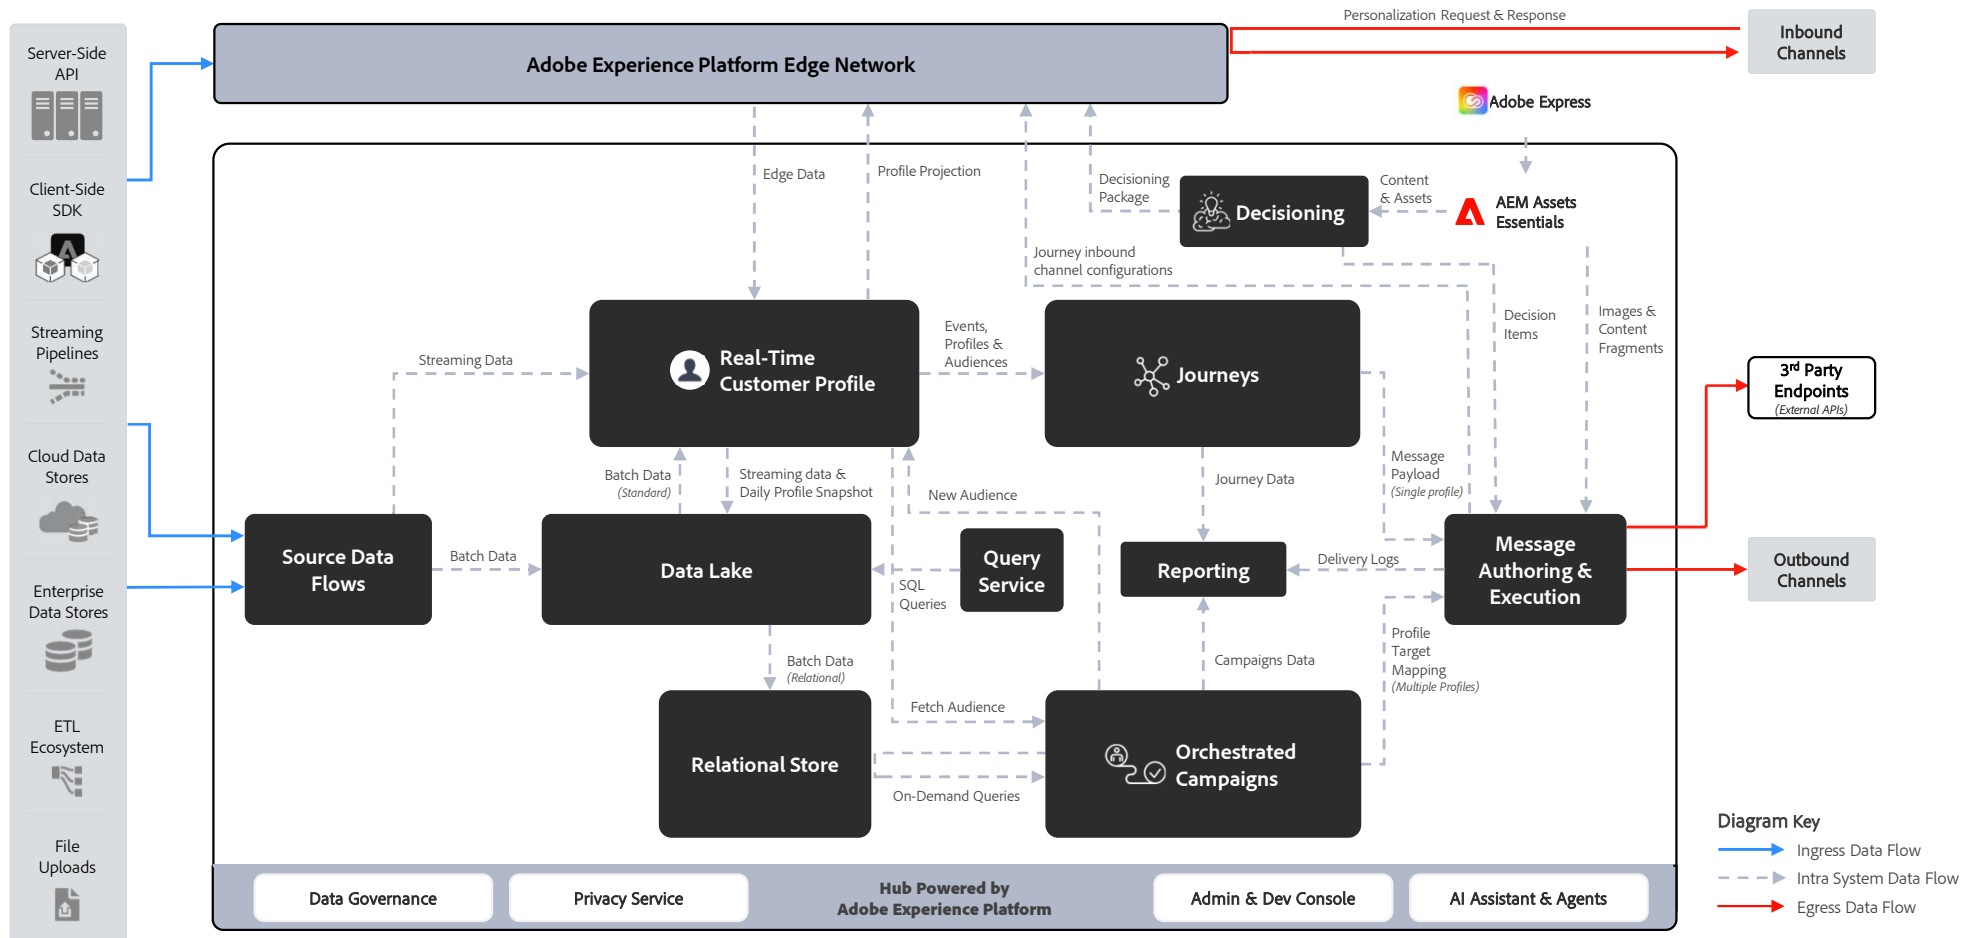

Core Capabilities

- ✓ Ad-hoc activation due to unknown timing of launch announcement from manufacturer
- ✓ Ability to send to both the account holder and individual account lines
- ✓ Personalize messages utilizing both account and line level information

Use Case #1 – Critical Thinking Questions

Question		Choice(s)
1	Who is the authenticated marketable entity?	☐ Person ☐ Device
2	What channel(s) are required to deliver the experience?	☐ Outbound ☐ Inbound
3	What data source(s) are going to be used to support the use case?	☐ Batch-based ☐ Stream-based
4	What kind of segmentation is required?	☐ Ad-hoc / Scheduled ☐ Streaming
5	What orchestration pattern is needed?	☐ Audience-based ☐ Individual-based

Highlight What Architecture Pieces are Needed

Use Case #1 Recommended Solution

Orchestrated Campaigns	Journeys
☐	☐
Decisioning Required?	
☐ Yes ☐ No	

Use Case #2

Post-Purchase Excitement

Marketing Brief – Use Case #2

Use Case Name

Post-Purchase Excitement

Goal

Improve post-purchase communication and customer satisfaction

KPIs

- ✓ % Email Open Rate
- ✓ % Delivery Tracking Clicks

Description

When a customer places an order, send a confirmation message with order details. Once the order is shipped, trigger a second message with tracking information retrieved dynamically from a 3rd-party API.

Variations

- ✓ Send via email or push depending on preferred channel
- ✓ Offer cross-sell (e.g., device protection) in the same flow.

Data Requirements

- ✓ Order information
- ✓ Customer account information
- ✓ Consent information
- ✓ Shipping information

Channels

- ✓ Email
- ✓ Push Notification (optional)

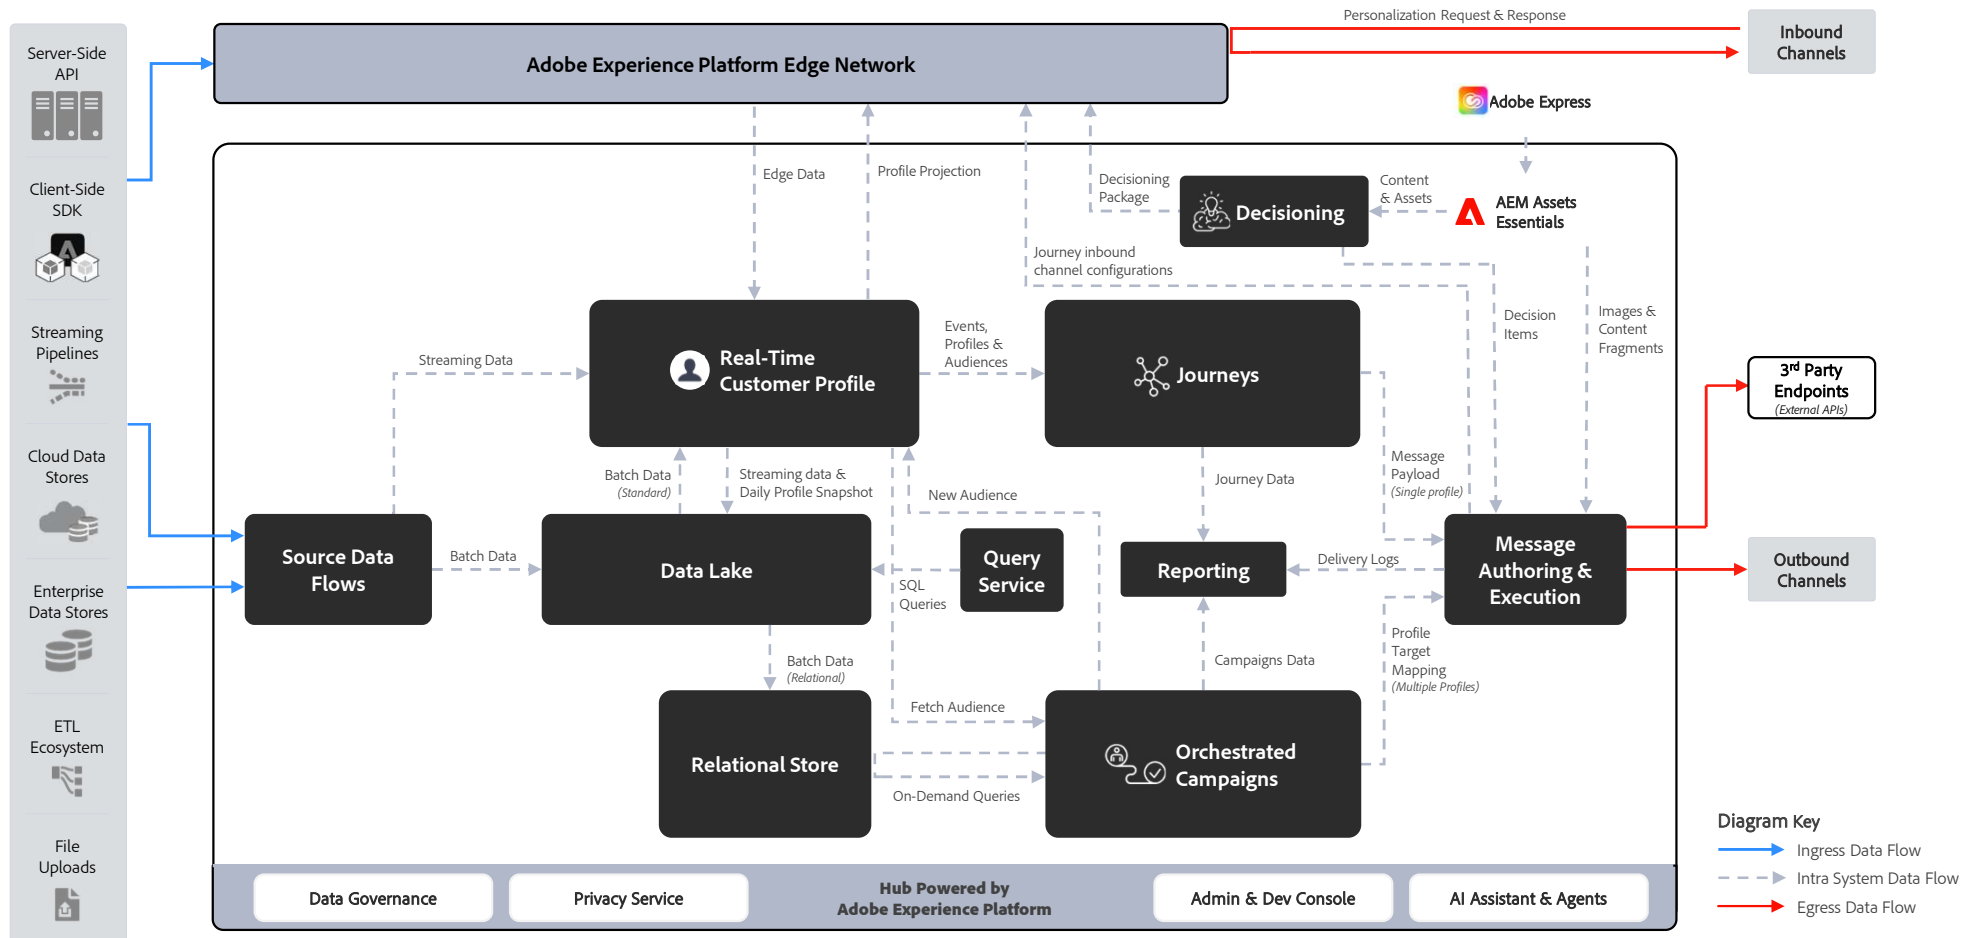

Core Capabilities

- ✓ Ability to ingest transactional events (Order Placed, Shipped)
- ✓ Ability to link event to profile (via CRMID)
- ✓ Ability to orchestrate multi-step unitary events
- ✓ Ability to enrich via webhook calls
- ✓ Ability to execute real-time messaging (Order → Shipped)

Use Case #2 – Critical Thinking Questions

Question		Choice(s)
1	Who is the authenticated marketable entity?	☐ Person ☐ Device
2	What channel(s) are required to deliver the experience?	☐ Outbound ☐ Inbound
3	What data source(s) are going to be used to support the use case?	☐ Batch-based ☐ Stream-based
4	What kind of segmentation is required?	☐ Ad-hoc / Scheduled ☐ Streaming
5	What orchestration pattern is needed?	☐ Audience-based ☐ Individual-based

Highlight What Architecture Pieces are Needed

Use Case #2 Recommended Solution

Orchestrated Campaigns	Journeys
☐	☐
Decisioning Required?	
☐ Yes ☐ No	

Use Case #3

Flagship Phone Abandoned Browse

Marketing Brief – Use Case #3

Use Case Name

Flagship Phone Abandoned Browse

Goal

Recover High-intent customers and drive conversions

KPIs

- ✓ % Conversion After Browse
- ✓ % Journey Entry vs Exit

Description

When a customer views a flagship phone page more than 3 times in a single day and does not purchase the phone, trigger an experience to ensure that all Connection 5G owned surfaces are personalized with contextual content based on the age of the account holder and what plan they have. The tier of the phone offered to the end user should dynamically update real-time depending on if they respond to the offer they are presented with. Only certain offers should be shown to users with the correct plan.

Variations

- ✓ Adjust 3 views per day to variable thresholds
- ✓ Same-session pop-up recommendation

Data Requirements

- ✓ Web product page views
- ✓ Customer account information
- ✓ Consent information

Channels

- ✓ In-store Kiosk
- ✓ Call Center Agent
- ✓ Web

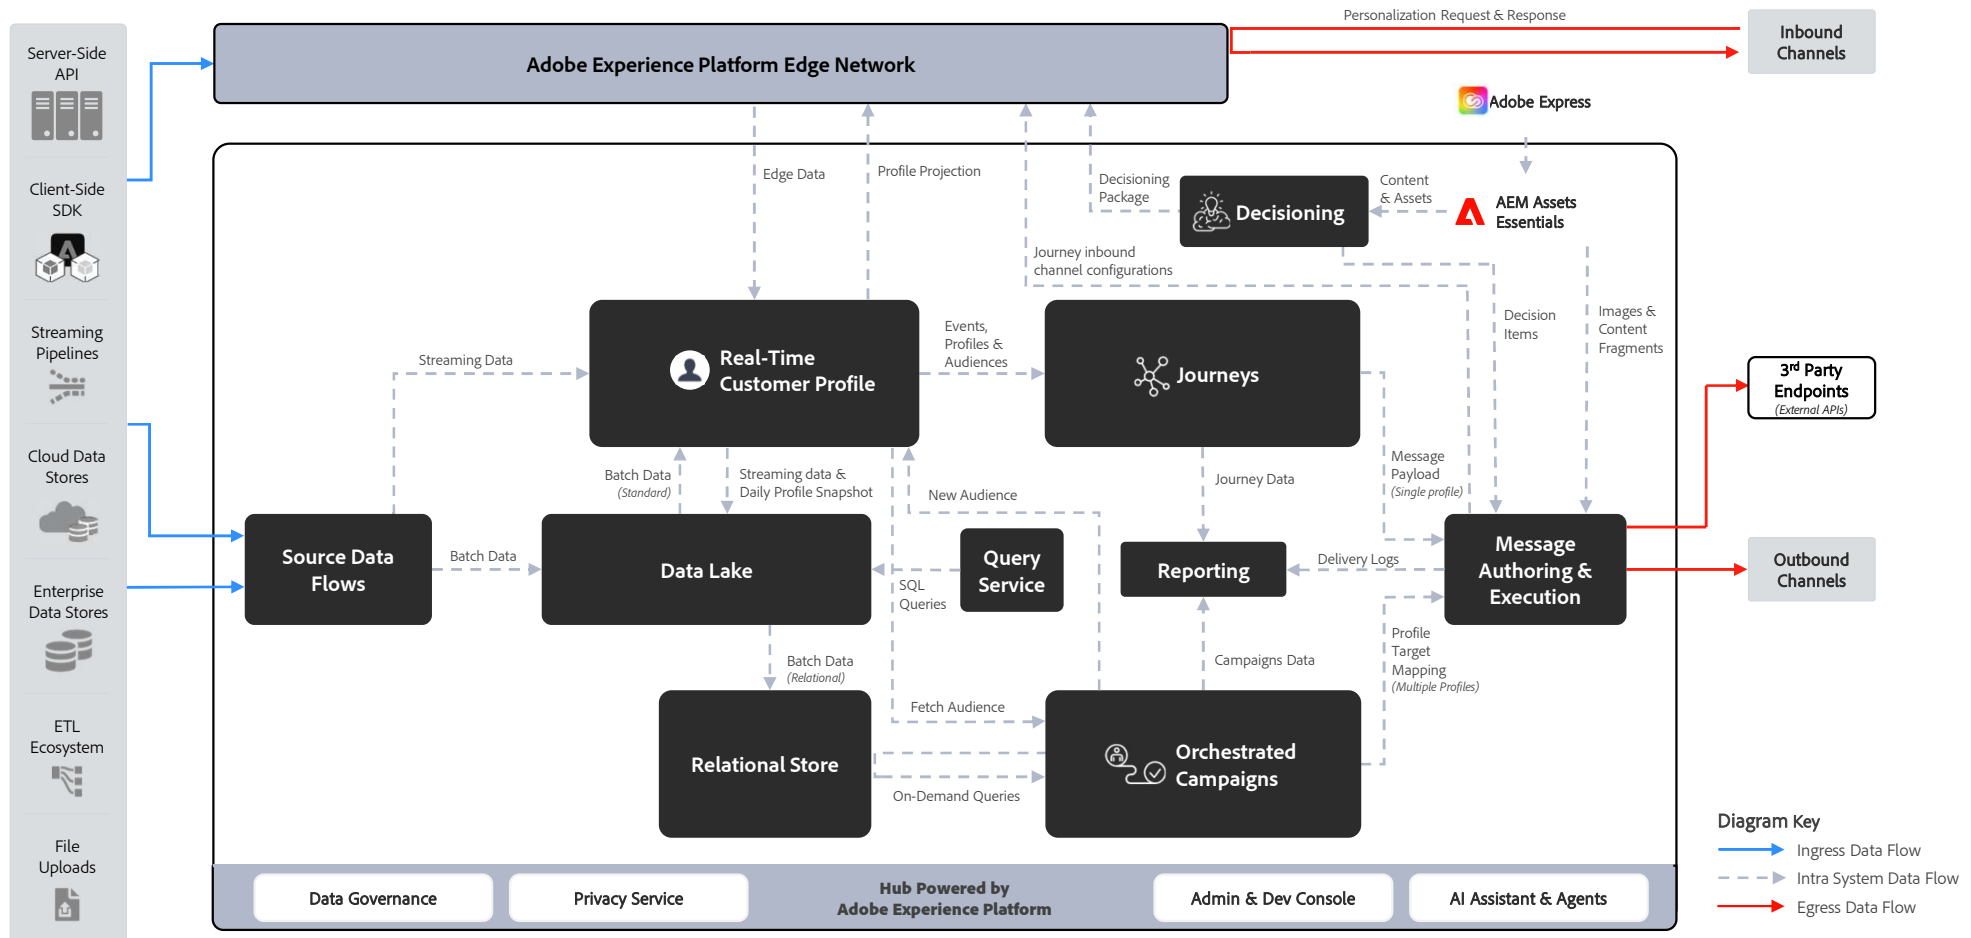

Core Capabilities

- ✓ Ability to track # of product page views and set a threshold
- ✓ Ability to trigger an experience when the threshold is exceeded
- ✓ Ability to link events to profiles in real-time
- ✓ Ability to personalize the content based on the product viewed
- ✓ Ability to surface same-page or same-session offers

Use Case #3 – Critical Thinking Questions

Question		Choice(s)
1	Who is the authenticated marketable entity?	☐ Person ☐ Device
2	What channel(s) are required to deliver the experience?	☐ Outbound ☐ Inbound
3	What data source(s) are going to be used to support the use case?	☐ Batch-based ☐ Stream-based
4	What kind of segmentation is required?	☐ Ad-hoc / Scheduled ☐ Streaming
5	What orchestration pattern is needed?	☐ Audience-based ☐ Individual-based

Highlight What Architecture Pieces are Needed

Use Case #3 Recommended Solution

Orchestrated Campaigns	Journeys
☐	☐
Decisioning Required?	
☐ Yes ☐ No	

Reference Materials

Two Orchestration Engines Compared

Feature	Orchestrated Campaigns	Journeys
Activation Pattern	Audience-based	Individual-based
Architecture Model	Batch	Streaming, event-driven
Primary Data Store	Relational Store	Real-Time Customer Profile
Segmentation Pattern	On-demand / Scheduled	Streaming and daily batch job
Delivery Execution	One or many messages per profile	Only one message per profile
Channels	Outbound only	Outbound + Inbound
Best For	Ad-hoc events or onboarding	In-the-moment experiences
